

# Excel Validation Report

Generated on: 12/8/2025, 5:03:56 AM

## Validation Summary

Total Rows Processed: 200

Valid Rows: 0

Rows with Errors: 200

## Detailed Error List

Row 1:

Question "A data engineering team is required to balance traffic across multiple EC2 instances. Which AWS service should they use?" already exists

Row 2:

Question "A startup is designing a new system that must archive financial records for 10 years. Which AWS service is most suitable?" already exists

Row 3:

Error checking question existence: read ECONNRESET

Row 4:

Question "An enterprise workload requires run scalable compute workloads. Which AWS service should the solutions architect choose?" already exists

Row 5:

Question "An application faces challenges because it must run scalable compute workloads. What AWS service best solves this issue?" already exists

Row 6:

Question "An enterprise workload requires monitor system metrics in real time. Which AWS service should the solutions architect choose?" already

Row 7:

Question "A startup is designing a new system that must encrypt sensitive data at rest. Which AWS service is most suitable?" already exists

Row 8:

Question "An application faces challenges because it must secure workloads inside isolated subnets. What AWS service best solves this issue?" already

Row 9:

Question "An application faces challenges because it must secure workloads inside isolated subnets. What AWS service best solves this issue?" already

Row 10:

Question "An enterprise workload requires process petabyte-scale analytics via Hadoop. Which AWS service should the solutions architect choose?"

already exists

Row 11:

Question "A company needs to secure workloads inside isolated subnets. Which AWS service is the best fit?" already exists

Row 12:

Question "An enterprise workload requires train ML models on large datasets. Which AWS service should the solutions architect choose?" already exists

Row 13:

Question "An enterprise workload requires run a scalable enterprise data warehouse. Which AWS service should the solutions architect choose?"

Row 14: already exists

Question "A data engineering team is required to auto-scale capacity based on CPU usage. Which AWS service should they use?" already exists

Row 15:

Question "A data engineering team is required to store relational data with failover support. Which AWS service should they use?" already exists

Row 16:

Question "A data engineering team is required to archive financial records for 10 years. Which AWS service should they use?" already exists

Row 17:

Question "An enterprise workload requires train ML models on large datasets. Which AWS service should the solutions architect choose?" already exists

Row 18:

Question "An enterprise workload requires build generative AI applications using FMs. Which AWS service should the solutions architect choose?"

Row 19: already exists

Question "A company needs to store relational data with failover support. Which AWS service is the best fit?" already exists

Row 20:

Question "A company needs to balance traffic across multiple EC2 instances. Which AWS service is the best fit?" already exists

Row 21:

Question "An application faces challenges because it must encrypt sensitive data at rest. What AWS service best solves this issue?" already exists

Row 22:

Question "A data engineering team is required to build generative AI applications using FMs. Which AWS service should they use?" already exists

Row 23:

Question "A company needs to create a dedicated private connection to AWS. Which AWS service is the best fit?" already exists

Row 24:

Question "A data engineering team is required to perform ETL jobs on large data pipelines. Which AWS service should they use?" already exists

Row 25:

Question "A data engineering team is required to monitor system metrics in real time. Which AWS service should they use?" already exists

Row 26:

Question "A startup is designing a new system that must run backend logic without provisioning servers. Which AWS service is most suitable?" already exists

Row 27: exists

Question "An application faces challenges because it must run scalable

compute workloads. What AWS service best solves this issue?" already exists

Row 28:

Question "A company needs to secure workloads inside isolated subnets. Which AWS service is the best fit?" already exists

Row 29:

Question "A startup is designing a new system that must run scalable compute workloads. Which AWS service is most suitable?" already exists

Row 30:

Question "A startup is designing a new system that must store relational data with failover support. Which AWS service is most suitable?" already exists

Row 31:

Question "A startup is designing a new system that must create a dedicated private connection to AWS. Which AWS service is most suitable?" already exists

Row 32:  
exists

Question "An enterprise workload requires track API calls for security auditing. Which AWS service should the solutions architect choose?" already exists

Row 33:

Question "A company needs to handle millions of NoSQL requests per second. Which AWS service is the best fit?" already exists

Row 34:

Question "An enterprise workload requires build generative AI applications using FMs. Which AWS service should the solutions architect choose?"

Row 35:  
already exists

Question "A company needs to centrally manage user permissions. Which AWS service is the best fit?" already exists

Row 36:

Question "An enterprise workload requires auto-scale capacity based on CPU usage. Which AWS service should the solutions architect choose?" already exists

Row 37:  
exists

Question "A company needs to create a dedicated private connection to AWS. Which AWS service is the best fit?" already exists

Row 38:

Question "A startup is designing a new system that must store unstructured documents with high durability. Which AWS service is most suitable?" already exists

Row 39:  
exists

Question "A startup is designing a new system that must secure workloads inside isolated subnets. Which AWS service is most suitable?" already exists

Row 40:

Question "An enterprise workload requires run a scalable enterprise data warehouse. Which AWS service should the solutions architect choose?"

Row 41:  
already exists

Question "A startup is designing a new system that must secure workloads inside isolated subnets. Which AWS service is most suitable?" already exists

Row 42:

Question "An application faces challenges because it must track API calls for security auditing. What AWS service best solves this issue?" already exists

Row 43:

Question "An enterprise workload requires run backend logic without provisioning servers. Which AWS service should the solutions architect

Row 44:  
choose?" already exists

Question "A startup is designing a new system that must auto-scale capacity

based on CPU usage. Which AWS service is most suitable?" already exists

Row 45:

Question "An application faces challenges because it must balance traffic across multiple EC2 instances. What AWS service best solves this issue?"

Row 46: already exists

Question "A startup is designing a new system that must track API calls for security auditing. Which AWS service is most suitable?" already exists

Row 47:

Question "A startup is designing a new system that must build generative AI applications using FMs. Which AWS service is most suitable?" already exists

Row 48:

Question "A data engineering team is required to auto-scale capacity based on CPU usage. Which AWS service should they use?" already exists

Row 49:

Question "A company needs to process petabyte-scale analytics via Hadoop. Which AWS service is the best fit?" already exists

Row 50:

Question "An enterprise workload requires train ML models on large datasets. Which AWS service should the solutions architect choose?" already exists

Row 51:

Question "A startup is designing a new system that must balance traffic across multiple EC2 instances. Which AWS service is most suitable?" already exists

Row 52:

Question "A data engineering team is required to run a scalable enterprise data warehouse. Which AWS service should they use?" already exists

Row 53:

Question "A startup is designing a new system that must encrypt sensitive data at rest. Which AWS service is most suitable?" already exists

Row 54:

Question "An application faces challenges because it must secure workloads inside isolated subnets. What AWS service best solves this issue?" already

Row 55: exists

Question "An enterprise workload requires run backend logic without provisioning servers. Which AWS service should the solutions architect

Row 56: choose?" already exists

Question "A startup is designing a new system that must track API calls for security auditing. Which AWS service is most suitable?" already exists

Row 57:

Question "An application faces challenges because it must secure workloads inside isolated subnets. What AWS service best solves this issue?" already

Row 58: exists

Question "A company needs to train ML models on large datasets. Which AWS service is the best fit?" already exists

Row 59:

Question "An enterprise workload requires auto-scale capacity based on CPU usage. Which AWS service should the solutions architect choose?" already

Row 60: exists

Question "A data engineering team is required to train ML models on large datasets. Which AWS service should they use?" already exists

Row 61:

Question "An enterprise workload requires query large datasets stored in S3

using SQL. Which AWS service should the solutions architect choose?" already exists

Row 62:

Question "A company needs to handle millions of NoSQL requests per second. Which AWS service is the best fit?" already exists

Row 63:

Question "A data engineering team is required to centrally manage user permissions. Which AWS service should they use?" already exists

Row 64:

Question "An enterprise workload requires balance traffic across multiple EC2 instances. Which AWS service should the solutions architect choose?" already exists

Row 65:

Question "An application faces challenges because it must query large datasets stored in S3 using SQL. What AWS service best solves this issue?" already exists

Row 66:

Question "A company needs to handle millions of NoSQL requests per second. Which AWS service is the best fit?" already exists

Row 67:

Question "An enterprise workload requires create a dedicated private connection to AWS. Which AWS service should the solutions architect choose?" already exists

Row 68:

Question "A data engineering team is required to run scalable compute workloads. Which AWS service should they use?" already exists

Row 69:

Question "An enterprise workload requires auto-scale capacity based on CPU usage. Which AWS service should the solutions architect choose?" already exists

Row 70:

Question "A data engineering team is required to build generative AI applications using FMs. Which AWS service should they use?" already exists

Row 71:

Question "An application faces challenges because it must run scalable compute workloads. What AWS service best solves this issue?" already exists

Row 72:

Question "An enterprise workload requires query large datasets stored in S3 using SQL. Which AWS service should the solutions architect choose?" already exists

Row 73:

Question "A company needs to perform ETL jobs on large data pipelines. Which AWS service is the best fit?" already exists

Row 74:

Question "An enterprise workload requires store relational data with failover support. Which AWS service should the solutions architect choose?" already exists

Row 75:

Question "A data engineering team is required to run scalable compute workloads. Which AWS service should they use?" already exists

Row 76:

Question "A company needs to track API calls for security auditing. Which AWS service is the best fit?" already exists

Row 77:

Question "A data engineering team is required to perform ETL jobs on large data pipelines. Which AWS service should they use?" already exists

Row 78:

Question "An application faces challenges because it must run scalable

compute workloads. What AWS service best solves this issue?" already exists

Row 79:

Question "A company needs to run scalable compute workloads. Which AWS service is the best fit?" already exists

Row 80:

Question "A data engineering team is required to monitor system metrics in real time. Which AWS service should they use?" already exists

Row 81:

Question "An application faces challenges because it must encrypt sensitive data at rest. What AWS service best solves this issue?" already exists

Row 82:

Question "A startup is designing a new system that must balance traffic across multiple EC2 instances. Which AWS service is most suitable?" already exists

Row 83:

Question "A startup is designing a new system that must auto-scale capacity based on CPU usage. Which AWS service is most suitable?" already exists

Row 84:

Question "A data engineering team is required to store unstructured documents with high durability. Which AWS service should they use?" already exists

Row 85:

Question "An application faces challenges because it must encrypt sensitive data at rest. What AWS service best solves this issue?" already exists

Row 86:

Question "An enterprise workload requires monitor system metrics in real time. Which AWS service should the solutions architect choose?" already exists

Row 87:

Question "A data engineering team is required to process petabyte-scale analytics via Hadoop. Which AWS service should they use?" already exists

Row 88:

Question "A company needs to store relational data with failover support. Which AWS service is the best fit?" already exists

Row 89:

Question "A data engineering team is required to run scalable compute workloads. Which AWS service should they use?" already exists

Row 90:

Question "A startup is designing a new system that must run a scalable enterprise data warehouse. Which AWS service is most suitable?" already exists

Row 91:

Question "A startup is designing a new system that must archive financial records for 10 years. Which AWS service is most suitable?" already exists

Row 92:

Question "A startup is designing a new system that must process petabyte-scale analytics via Hadoop. Which AWS service is most suitable?" already exists

Row 93:

Question "A company needs to encrypt sensitive data at rest. Which AWS service is the best fit?" already exists

Row 94:

Question "A data engineering team is required to archive financial records for 10 years. Which AWS service should they use?" already exists

Row 95:

Question "An enterprise workload requires encrypt sensitive data at rest.

Which AWS service should the solutions architect choose?" already exists

Row 96:

Question "An application faces challenges because it must handle millions of NoSQL requests per second. What AWS service best solves this issue?"

Row 97: already exists

Question "A startup is designing a new system that must monitor system metrics in real time. Which AWS service is most suitable?" already exists

Row 98:

Question "A startup is designing a new system that must run backend logic without provisioning servers. Which AWS service is most suitable?" already exists

Row 99: exists

Question "A startup is designing a new system that must monitor system metrics in real time. Which AWS service is most suitable?" already exists

Row 100:

Question "A data engineering team is required to monitor system metrics in real time. Which AWS service should they use?" already exists

Row 101:

Question "A data engineering team is required to auto-scale capacity based on CPU usage. Which AWS service should they use?" already exists

Row 102:

Question "A data engineering team is required to secure workloads inside isolated subnets. Which AWS service should they use?" already exists

Row 103:

Question "A company needs to build generative AI applications using FMs. Which AWS service is the best fit?" already exists

Row 104:

Question "A data engineering team is required to track API calls for security auditing. Which AWS service should they use?" already exists

Row 105:

Question "A startup is designing a new system that must create a dedicated private connection to AWS. Which AWS service is most suitable?" already exists

Row 106: exists

Question "An application faces challenges because it must handle millions of NoSQL requests per second. What AWS service best solves this issue?"

Row 107: already exists

Question "A startup is designing a new system that must create a dedicated private connection to AWS. Which AWS service is most suitable?" already exists

Row 108: exists

Question "A startup is designing a new system that must store relational data with failover support. Which AWS service is most suitable?" already exists

Row 109:

Question "An application faces challenges because it must query large datasets stored in S3 using SQL. What AWS service best solves this issue?"

Row 110: exists

Question "An enterprise workload requires perform ETL jobs on large data pipelines. Which AWS service should the solutions architect choose?" already exists

Row 111: exists

Question "A data engineering team is required to archive financial records for 10 years. Which AWS service should they use?" already exists

Row 112:

Question "A company needs to run backend logic without provisioning servers.

Which AWS service is the best fit?" already exists

Row 113:

Question "An enterprise workload requires build generative AI applications using FMs. Which AWS service should the solutions architect choose?"

Row 114: already exists

Question "An application faces challenges because it must handle millions of NoSQL requests per second. What AWS service best solves this issue?"

Row 115: already exists

Question "An application faces challenges because it must monitor system metrics in real time. What AWS service best solves this issue?" already exists

Row 116:

Question "An enterprise workload requires store unstructured documents with high durability. Which AWS service should the solutions architect choose?"

Row 117: already exists

Question "An enterprise workload requires auto-scale capacity based on CPU usage. Which AWS service should the solutions architect choose?" already exists

Row 118: exists

Question "A data engineering team is required to create a dedicated private connection to AWS. Which AWS service should they use?" already exists

Row 119:

Question "A startup is designing a new system that must centrally manage user permissions. Which AWS service is most suitable?" already exists

Row 120:

Question "A company needs to auto-scale capacity based on CPU usage. Which AWS service is the best fit?" already exists

Row 121:

Question "A startup is designing a new system that must centrally manage user permissions. Which AWS service is most suitable?" already exists

Row 122:

Question "A data engineering team is required to monitor system metrics in real time. Which AWS service should they use?" already exists

Row 123:

Question "A startup is designing a new system that must build generative AI applications using FMs. Which AWS service is most suitable?" already exists

Row 124:

Question "A data engineering team is required to process petabyte-scale analytics via Hadoop. Which AWS service should they use?" already exists

Row 125:

Question "An enterprise workload requires train ML models on large datasets. Which AWS service should the solutions architect choose?" already exists

Row 126:

Question "A company needs to handle millions of NoSQL requests per second. Which AWS service is the best fit?" already exists

Row 127:

Question "An enterprise workload requires store relational data with failover support. Which AWS service should the solutions architect choose?" already exists

Row 128: exists

Question "An application faces challenges because it must centrally manage user permissions. What AWS service best solves this issue?" already exists

Row 129:

Question "A company needs to monitor system metrics in real time. Which

AWS service is the best fit?" already exists

Row 130:

Question "An application faces challenges because it must store relational data with failover support. What AWS service best solves this issue?" already exists

Question "An application faces challenges because it must balance traffic across multiple EC2 instances. What AWS service best solves this issue?" already exists

Question "An application faces challenges because it must archive financial records for 10 years. What AWS service best solves this issue?" already exists

Row 133:

Question "An application faces challenges because it must run scalable compute workloads. What AWS service best solves this issue?" already exists

Row 134:

Question "An enterprise workload requires run backend logic without provisioning servers. Which AWS service should the solutions architect choose?" already exists

Question "A data engineering team is required to run scalable compute workloads. Which AWS service should they use?" already exists

Row 136:

Question "A data engineering team is required to run scalable compute workloads. Which AWS service should they use?" already exists

Row 137:

Question "A company needs to build generative AI applications using FMs. Which AWS service is the best fit?" already exists

Row 138:

Question "A company needs to perform ETL jobs on large data pipelines. Which AWS service is the best fit?" already exists

Row 139:

Question "A startup is designing a new system that must create a dedicated private connection to AWS. Which AWS service is most suitable?" already exists

Row 140:

Question "A startup is designing a new system that must query large datasets stored in S3 using SQL. Which AWS service is most suitable?" already exists

Row 141:

Question "A data engineering team is required to store relational data with failover support. Which AWS service should they use?" already exists

Row 142:

Question "An enterprise workload requires archive financial records for 10 years. Which AWS service should the solutions architect choose?" already exists

Row 143:

Question "An application faces challenges because it must monitor system metrics in real time. What AWS service best solves this issue?" already exists

Row 144:

Question "An enterprise workload requires create a dedicated private connection to AWS. Which AWS service should the solutions architect choose?" already exists

Row 145:

Question "A startup is designing a new system that must create a dedicated private connection to AWS. Which AWS service is most suitable?" already exists

Row 146:

Question "A data engineering team is required to create a dedicated private

connection to AWS. Which AWS service should they use?" already exists

Row 147:

Question "An application faces challenges because it must archive financial records for 10 years. What AWS service best solves this issue?" already exists

Row 148:

Question "An enterprise workload requires query large datasets stored in S3 using SQL. Which AWS service should the solutions architect choose?"

Row 149: already exists

Question "An enterprise workload requires train ML models on large datasets. Which AWS service should the solutions architect choose?" already exists

Row 150:

Question "A data engineering team is required to store unstructured documents with high durability. Which AWS service should they use?" already exists

Row 151: exists

Question "An application faces challenges because it must create a dedicated private connection to AWS. What AWS service best solves this issue?" already exists

Row 152: exists

Question "A data engineering team is required to perform ETL jobs on large data pipelines. Which AWS service should they use?" already exists

Row 153:

Question "A company needs to store unstructured documents with high durability. Which AWS service is the best fit?" already exists

Row 154:

Question "A company needs to monitor system metrics in real time. Which AWS service is the best fit?" already exists

Row 155:

Question "A startup is designing a new system that must process petabyte-scale analytics via Hadoop. Which AWS service is most suitable?" already exists

Row 156: exists

Question "An enterprise workload requires handle millions of NoSQL requests per second. Which AWS service should the solutions architect choose?"

Row 157: already exists

Question "A startup is designing a new system that must encrypt sensitive data at rest. Which AWS service is most suitable?" already exists

Row 158:

Question "A startup is designing a new system that must encrypt sensitive data at rest. Which AWS service is most suitable?" already exists

Row 159:

Question "An application faces challenges because it must build generative AI applications using FMs. What AWS service best solves this issue?" already exists

Row 160: exists

Question "A startup is designing a new system that must handle millions of NoSQL requests per second. Which AWS service is most suitable?" already exists

Row 161: exists

Question "An enterprise workload requires centrally manage user permissions. Which AWS service should the solutions architect choose?"

Row 162: already exists

Question "An enterprise workload requires run backend logic without provisioning servers. Which AWS service should the solutions architect choose?" already exists

Row 163: choose?" already exists

Question "A data engineering team is required to perform ETL jobs on large

data pipelines. Which AWS service should they use?" already exists

Row 164:

Question "A company needs to create a dedicated private connection to AWS. Which AWS service is the best fit?" already exists

Row 165:

Question "An application faces challenges because it must handle millions of NoSQL requests per second. What AWS service best solves this issue?"

Row 166: already exists

Question "A startup is designing a new system that must balance traffic across multiple EC2 instances. Which AWS service is most suitable?" already exists

Row 167:

Question "An application faces challenges because it must build generative AI applications using FMs. What AWS service best solves this issue?" already exists

Row 168:

Question "A data engineering team is required to encrypt sensitive data at rest. Which AWS service should they use?" already exists

Row 169:

Question "An application faces challenges because it must store unstructured documents with high durability. What AWS service best solves this issue?"

Row 170: already exists

Question "An application faces challenges because it must run scalable compute workloads. What AWS service best solves this issue?" already exists

Row 171:

Question "A company needs to create a dedicated private connection to AWS. Which AWS service is the best fit?" already exists

Row 172:

Question "An enterprise workload requires archive financial records for 10 years. Which AWS service should the solutions architect choose?" already exists

Row 173:

Question "A company needs to centrally manage user permissions. Which AWS service is the best fit?" already exists

Row 174:

Question "A data engineering team is required to run backend logic without provisioning servers. Which AWS service should they use?" already exists

Row 175:

Question "An enterprise workload requires secure workloads inside isolated subnets. Which AWS service should the solutions architect choose?" already exists

Row 176:

Question "A data engineering team is required to monitor system metrics in real time. Which AWS service should they use?" already exists

Row 177:

Question "A startup is designing a new system that must monitor system metrics in real time. Which AWS service is most suitable?" already exists

Row 178:

Question "A company needs to encrypt sensitive data at rest. Which AWS service is the best fit?" already exists

Row 179:

Question "A startup is designing a new system that must encrypt sensitive data at rest. Which AWS service is most suitable?" already exists

Row 180:

Question "A startup is designing a new system that must auto-scale capacity

based on CPU usage. Which AWS service is most suitable?" already exists

Row 181:

Question "An application faces challenges because it must run backend logic without provisioning servers. What AWS service best solves this issue?"

Row 182: already exists

Question "A startup is designing a new system that must secure workloads inside isolated subnets. Which AWS service is most suitable?" already exists

Row 183:

Question "An enterprise workload requires train ML models on large datasets."

Which AWS service should the solutions architect choose?" already exists

Row 184:

Question "A company needs to perform ETL jobs on large data pipelines."

Which AWS service is the best fit?" already exists

Row 185:

Question "A company needs to handle millions of NoSQL requests per second. Which AWS service is the best fit?" already exists

Row 186:

Question "A company needs to store relational data with failover support."

Which AWS service is the best fit?" already exists

Row 187:

Question "A data engineering team is required to store relational data with failover support. Which AWS service should they use?" already exists

Row 188:

Question "An application faces challenges because it must track API calls for security auditing. What AWS service best solves this issue?" already exists
